

# Active and passive filters

We provide a complete range of solutions for the **compensation of current harmonics** due to the presence of power electronics in electrical systems.

Our products include **active and passive filters**, with a wide range of standard and modular solutions for each application. For special or critical systems we are able to analyze the problems of electrical systems and to design a custom filter optimized for each solution.

- ▼ **Modular design**
- ▼ **Reduced size**
- ▼ **High energy efficiency**

	Current	Features	Application
FIActive PRO	80 A for module Up to 1920 A	Compensation up to 51 <sup>st</sup> harmonic	Industry – Energy saving
PASSIVE FILTER	On request – Up to 10 kA	Cut up to 23 <sup>rd</sup> harmonic	Industry
