

BESS battery energy storage systems

We provide complete solutions for **energy storage in solar plants**. Our BESS allow to solve the problem of intermittence in production of energy from solar plants, stabilizing the power supply.

Our systems combine the usage of reliable batteries with highly efficient conversion products to obtain the best solution for each different plant.

- Flexible solutions
- Modular energy storage
- Efficiency improvement

	Module Power	Parallel Power	Battery	Life battery
GP-ST	250-500-1000 kW	Up to request	Pb	1500 cycles
GPBESS			Li	5000 cycles
