

Battery monitoring systems

Monitbatt is the battery management system for **real-time** voltage, impedance, current and temperature **monitoring** in a battery system.

It monitors the balance of block voltage, increasing reliability and **extending batteries' lifetime**. Monitbatt is easy to install, provides a storage memory for battery history database and allows wireless communication.

- ▼ Easy installation
- ▼ Extended battery lifetime
- ▼ Wireless communication

	Monitoring	Communication	Batteries system
MONITBATT	Up to 750 nodes	WIFI - Ethernet - Modbus	Up to 750Vdc - Up to 3000A
