

Earthing systems

We provide neutral earthing systems able to **control overcurrents** during earth fault instances and avoid overheating of other electrical components.

Each product is designed and manufactured according to the customer's specifications, to obtain the best configuration for high mechanical strength and low losses. We are able to provide solutions for systems with available neutral wire. Moreover, a neutral can be created, protected and made stable through our **earthing systems**.

- Low losses
- High mechanical strength
- Minimum maintenance

	Neutral condition	Connection	Voltage	Type
T1N	Neutral available	Directly on N	Up to 52 kV	Dry type
T3TN	Neutral available	3P + N	Up to 52 kV	Oil filled/Dry type
T3ND	Neutral not available	3P with secondary delta	Up to 36 kV	Oil filled /dry type
T3NZ	Neutral not available	3P (ZZ conn.)	Up to 36 kV	Oil filled /dry type
