

# STS/ATS

## static and automatic transfer switch

We have a wide experience in producing transfer switches for no-break transfers between two different power sources, in order to supply the load without power shortage in case of failure of the main source. We offer a complete range of products: from standard electromechanical ATS to STS equipment based on reliable thyristor technology, available as standard frame or as customized device.

- **High reliability**
- **Compact and easily controlled**
- **Rackmount version available**

	Power range	Transfer time	Feature	Application
ATS	Up to 400A	8~12ms	High quality/price ratio	Server, Datacenter
STS 1Ph	16-250A	< 5 ms	High quality and reliability	Airports, datacenters, network operations center, critical systems
STS 3Ph ST	32-1600A	< 5 ms		
STS 3Ph CUSTOM	Up to 6000A	< 5 ms
